Organizational Description

The Bowling Green-Warren County Hospital Corporation (the “Corporation”), is a private non-stock, nonprofit Kentucky corporation that operates a hospital facility in Bowling Green, Kentucky, under the name “The Medical Center at Bowling Green”, since 1993 a hospital and long term care and rehab facility in Scottsville, Kentucky under the name “The Medical Center at Scottsville,” and since 2016 a hospital in Horse Cave, Kentucky under the name “The Medical Center at Caverna.” The three facilities are part of one corporation but are separately licensed by the State of Kentucky. References herein to “The Medical Center” refers to the combined facilities. References herein to “The Medical Center at Bowling Green” refer to the Corporation’s facilities in Bowling Green, Kentucky. References herein to “The Medical Center at Scottsville” refer to the Corporation’s facilities in Scottsville, Kentucky. References herein to “The Medical Center at Caverna” refer to the Corporation’s facilities in Horse Cave, Kentucky.

The Corporation has been determined by the Internal Revenue Service (the “IRS”) to be a charitable organization as described in Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (the “Code”) and is exempt from federal income taxation by virtue of Sections 501(a) and 501(c)(3) of the Code.

The Corporation is owned and controlled by Commonwealth Health Corporation, Inc., a non-stock, nonprofit Kentucky corporation (“Commonwealth”), under a holding company arrangement, which was established in 1984. Commonwealth has been determined by the IRS to be a charitable organization as described in Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (the “Code”) and is exempt from federal income taxation by virtue of Sections 501(a) and 501(c)(3) of the Code.

The Medical Center at Bowling Green was originally founded as The City Hospital in 1926. In 1946, the city hospital became jointly owned by the City of Bowling Green, Kentucky and the County of Warren, Kentucky and was operated by the Bowling Green-Warren County Hospital Commission (the “Commission”) as a public hospital. In 1977, the Corporation became the successor to the Commission with a stated purpose of leasing and operating existing Commission facilities and financing, constructing and operating a new hospital facility.

In 1980, The Medical Center at Bowling Green moved into a new, six-story, state-of-the-art facility, occupying 298,000 square feet on a 17-acre campus. Since 1980, because of an expanding demand for inpatient and outpatient services, several additions to The

Medical Center at Bowling Green have been made and both clinical and patient areas have been renovated and modernized.

The Medical Center at Bowling Green has undergone a series of expansions and has grown to be the largest and most comprehensive hospital facility in Southcentral Kentucky, offering a wide range of acute care and specialty services.

The Medical Center at Scottsville

The Medical Center at Scottsville offers residents of the area with convenient access to experienced doctors, quality healthcare services and health information.

In 1993, Commonwealth Health Corporation (CHC) purchased the Allen County War Memorial Hospital in Scottsville, KY. On that day, CHC made a commitment to the residents of the community to build a healthcare facility they could be proud of. Today, community members have access to first-rate inpatient and outpatient services including a 24-hour, full service emergency room. This is a 25 bed acute care Critical Access Hospital with an attached long term care facility, Cal Turner Rehab & Specialty Care. Cal Turner Rehab & Specialty Care is a 110 bed rehabilitation and skilled nursing facility.

The Medical Center at Scottsville also offers inpatient and outpatient physical therapy, the Rural Health Clinic and access to specialty providers through our Multi-Specialty Clinic.

Service Area Description

The primary service area for The Medical Center at Scottsville is Allen County with contiguous counties of Barren, Monroe, Simpson and Warren. According to the 2010 U.S. Census the population estimate as of July 1, 2014 for Allen County and the contiguous counties is projected to be 194,696. The Medical Center at Scottsville is located in the heart of Scottsville, Kentucky, which is the county seat of Allen County, Kentucky. The population of Allen County was approximately 20,000 according to the 2010 U.S. census. Allen County, Kentucky is contiguous to Warren County. As of 2000, there were 17,800 people in a land area of 346.12 square miles, an average population density of 51.4 people per square mile. The county seat is Scottsville.

The Hospital is located in the city of Scottsville, Kentucky in the County of Allen. Scottsville-Allen County is located in South Central Kentucky and is a rural county that has seen phenomenal growth attributable to its community values and the work ethic of its citizens. Although rural in nature, the county resides within 60 miles of Nashville, TN and just 20 miles of Bowling Green, KY allowing residents a multitude of cultural and sporting events. Allen County has become a center for fostering non-farm entrepreneurial growth. We are one of only 6 Kentucky counties to exceed the national average for entrepreneurial income growth. In the 2010 census, our population experienced a 12% growth rate. Agriculture comprises nearly 167,000 acres in our county and 94% of our farms are operated by an individual or family. We rank fifth in cattle/calf production, tenth in beef cows, and tenth in hay production. In 2007, we posted over 38 million dollars in cash receipts from livestock & crops. Our community assets are strong and foster exceptional work ethics and responsibility.

Our Community offers a state-of-the-art Senior Citizens Center that offers a multitude of activities, as well as the 40,000 square-foot fitness facility, the CORE, with programs offered for all ages. We are home of The Center for Courageous Kids, a world-class medical camp for critically ill children. The camp boasts an on-site medical center, equestrian center, bowling alley, indoor aquatic complex, and provides a wide variety of outdoor activities on over 168 acres.

Service Area

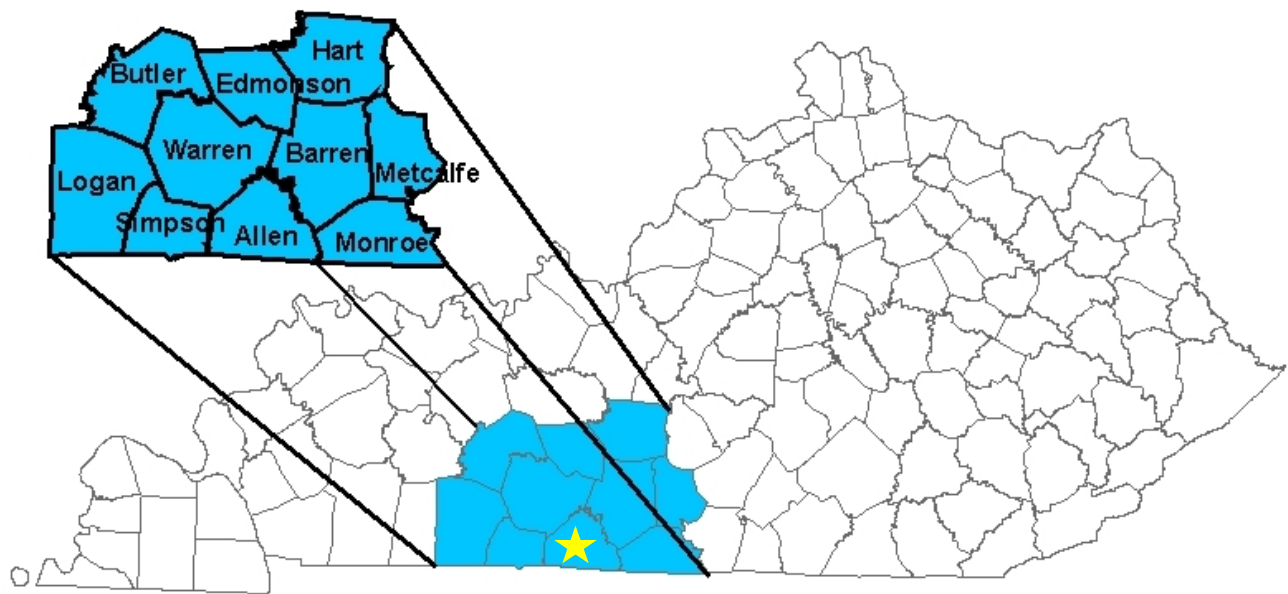

The Medical Center at Scottsville defines its service area by the majority of where our inpatients and outpatients reside. The Medical Center at Scottsville's primary service area is Allen County Kentucky. We also serve patients from the following zip codes in this area:

42101 Bowling Green, Warren Co. KY
42102 Bowling Green, Warren Co. KY
42103 Bowling Green, Warren Co. KY
42104 Bowling Green, Warren Co. KY
42134 Franklin, Simpson Co. KY
42135 Franklin, Simpson Co. KY
42141 Glasgow, Barren Co. KY
42164 Scottsville, Allen Co. KY
42120 Adolphus, Allen Co. KY
42133 Fountain Run, Monroe Co. KY

Over 90% of the patients at The Medical Center at Scottsville stem from the above zip codes. However, The Medical Center at Scottsville serves other areas outside this primary area such as portions of Northern Tennessee include the cities of Westmoreland, White House, and Lafayette. We also serve surrounding Kentucky cities such as Alvaton, Austin, Edmonton, Holland, Lucas, Smiths Grove, Tompkinsville and Russell Springs. There are other facilities who share this service area. In Warren County The Medical Center at Bowling Green and in Simpson County The Medical Center at Franklin also receive patients from these areas. In Barren County TJ Sampson Community Hospital and Monroe County has Monroe County Medical Center serve this population as well.

Mission, Vision, and Values

MISSION

The Medical Center at Scottsville mission is to care for people and improve the quality of life in the communities we serve.

VISION

The Medical Center at Scottsville will be an innovative leader in healthcare delivery and outcomes.

WHAT WE VALUE

Quality We are committed to providing the highest level of care and service at every opportunity.

People People are our most valuable resource. We work together to achieve our organization's goals. We treat everyone with honor, dignity, and respect.

Accountability Each of us is responsible for managing our resources ethically and wisely.

Purpose

The Community Needs Assessment has been completed for the following reasons:

- To help meet the Hospital's mission to care for people and improved the quality of life in the communities we serve.
- To comply with the Patient Protection and Affordable Care Act of 2010 and maintain the Hospital's tax exempt status.
- To establish community health needs for the Hospital's service area, to determine areas of greatest need and for the Hospital to develop a strategic plan to address those needs.
- To involve internal and external resources to ensure needs of individuals are met with efforts that are not duplicated.
- To create a sustainable process for conducting Community Health Needs Assessment to be continued for future assessments.

Executive Summary

The Patient Protection and Affordable Care Act of 2010 includes a provision that requires every tax exempt, non-governmental hospital to:

- Conduct a Community Health Needs Assessment (CHNA) at least every three years
- Adopt a Strategic Implementation Plan that includes how the needs identified in the assessment will be met; and
- Report to the Internal Revenue Service via its 990 tax form how it is meeting its implementation plan

The Community Health Needs Assessment Report (CHNA) details the process used to collect, disseminate and prioritize the information in the assessment. The health information results being reported is a collection from reputable national, state and local data sources. The results of our Community Health Needs Assessment Report (CHNA) validate our desires for individual and community health improvements. This valuable data will be utilized for community outreach, planning, and service improvements. The Medical Center at Scottsville worked closely with local healthcare and public health leaders throughout the assessment process. Our goal of this assessment is to develop partnerships within our community to identify health care opportunities that impact the residents of Allen County.

The end result of the assessment process was a development by the hospital of a strategic plan to address the major needs identified.

Process

In September 2011, The Medical Center joined with the Barren River District Health Department and numerous other healthcare providers, community organizations and leaders to form the Barren River Community Health Planning Council. The goal of the Council was to plan and implement a community health needs survey and assessment process followed by identification of key healthcare needs for the community and then development of strategic plans to meet those needs. The process used was primarily based on the Mobilizing for Action Through Planning and Partnership (MAPP), which was developed by the National Association of City and County Health Officials and the Centers for Disease Control and Prevention. Meetings were held twice monthly for three months and then once a month for 16 months.

In July 2014, partners began Cycle 2 of the assessment and planning activities with a focus on the local healthcare system. The priority health issues are Cardiovascular Disease, Diabetes, Obesity, Lung Disease and Drug Abuse and Addiction. We prioritized the following issues for action: Provider Capacity issues, Barriers to Accessing Health Services, Population with Access Issues or Barriers.

Over the fall and winter of 2014-15, partners voted to rename the council to the Barren River Initiative to Get Healthy Together or (BRIGHT) Coalition. Assessment activities follow the Mobilizing for Action through Planning and Partnerships (MAPP) framework.

The coalition reviewed evidence-based practices and strategies for improving community health status. They identified “gold standard” practices and policies that would be found in an ideal situation. The BRIGHT coalition and the Hospital’s strategic implementation plan are based on a few key priority gold standards to help address the needs of the community.

The assessment results and strategic plan were submitted to the hospital board for review and approval for availability to the community.

COMMUNITY HEALTH NEEDS REPORT

Community Demographics

Demographics and Socioeconomics

The Medical Center at Scottsville primarily serves the counties of Allen, Barren, Butler, Edmonson, Hart, Logan, Metcalfe, Monroe, Simpson, and Warren in Kentucky. The following tables show the demographics and socioeconomic characteristics of the Medical Center at Scottsville's primary service area for the most recent period. Allen County is compared to other counties in our development district and to the state.

Cancer Incidence Rates

Cancer incidence rates are from the Kentucky Cancer Registry and cover a five year span. Allen County has a slightly lower overall age adjusted rate for all sites, which is in line with the other counties in the Barren River Area Development District.

Cancer Incidence Rates in Barren River Area Development District, Kentucky		
All Genders, All Races, 2008-2012		
Site	Barren River Area Age Adjusted Rate	Allen County Age Adjust Rate
All Sites	503.1	434.9
Prostate (males only)	125.4	90.
Lung and Bronchus	101.4	80.7
Breast	57.9	60.9
Colon & Rectum	50.1	52.3
Melanoma of the Skin	23.8	14.6
Urinary Bladder	22.1	11.6
Miscellaneous	19.6	19.2
Kidney and Renal Pelvis	20.4	12.1
Corpus Uteri (females only)	21.4	21.
Non-Hodgkin Lymphoma	19.5	22.7
Ovary (females only)	9.6	12.8
In Situ Breast	13.2	5.5
Thyroid	15	17.3
Cervix Uteri (females only)	10.5	11.1
Pancreas	11.	12.3
All Other Causes	89.2	66.7

Health Statistics and Rankings

The Medical Center at Scottsville collected health statistics and outcome measures from a variety of sources. We used information from our Barren River Regional Development District sources, 2015 County Health Ranking Kentucky Data, and the Kentucky Cancer Registry. An analysis of various health outcomes and factors for a particular community can, if improved, help make that community a healthier place to live, learn, work, and play. And a better understanding of the factors that affect the health of the community will assist with how to improve the community's habits, culture, and environment. This portion of the community health needs assessment utilizes information from *County Health Rankings*, a key component of the Mobilizing Action Toward Community Health (MATCH) project, a collaboration between the Robert Wood Johnson Foundation and the University of Wisconsin Population Health Institute.

The County Health Rankings model is grounded in the belief that programs and policies implemented at the local, state, and federal levels have an impact on the variety of factors that, in turn, determine the health outcomes for communities across the nation. The model provides a ranking method that ranks all 50 states and the counties within each state, based on the measurement of two types of health outcomes for each county: Length of Life and Quality of Life. These outcomes are the result of a collection of health factors that are influenced by programs and policies at the local, state, and federal levels.

Counties in each of the 50 states are ranked according to summaries of a variety of health measures. Those having high ranks, e.g. 1 or 2, are considered to be the "healthiest." Counties are ranked relative to the health of other counties in the same state on the following summary measures:

- Health Outcomes--rankings are based on an equal weighting of one length of life (mortality) measure and four quality of life (morbidity) measures.
- Health Factors--rankings are based on weighted scores of four types of factors:
 - Health behaviors (7 measures)
 - Clinical care (5 measures)
 - Social and economic (7 measures)
 - Physical environment (5 measures)

A more detailed discussion about the ranking system, data sources and measures, data quality and calculating scores and ranks can be found at the website for County Health Rankings (www.countyhealthrankings.org).

As part of the analysis of the needs assessment for the community, the three counties that comprise the majority of the Community will be used to compare the relative health status of each county to the state of Kentucky as well as to a national benchmark. A better understanding of the factors that affect the health of the community will assist with how to improve the community's habits, culture, and environment.

The following tables, from County Health Rankings, summarize the 2015 Health Outcomes for the three counties that comprise the majority of the Community for The Medical Center at Scottsville. Each measure is described and includes a confidence interval or error margin surrounding it – if a measure is above the state average and the state average is beyond the error margin for the county, then further investigation is recommended.

ALLEN COUNTY

Health Outcomes--rankings are based on an equal weighting of one length of life (mortality) measure and four quality of life (morbidity) measures. While most of Allen County health outcomes were comparable to the state of Kentucky (ranking 65 and 75 out of 120 counties) opportunities are available for improvement.

A number of different health factors shape a community's health outcomes. The County Health Rankings model includes four types of health factors: health behaviors, clinical care, social and economic, and the physical environment.

The following table summarizes the health factors for Allen County. The following elements are recognized as areas for improvement.

- Health Behavior/ Adult Smoking
- Health Behavior/ Adult Obesity
- Health Behavior/ Physical Inactivity
- Clinical Care/ Diabetic Screening
- Clinical Care/ Mammography Screening

	Kentucky	Allen	Warren	Simpson	Barren	Monroe
Health Outcomes		65	19	51	25	72
Length of Life		68	13	73	28	86
Premature death	8900	9931	7380	10053	8136	11074
Quality of Life		56	39	30	28	40

Long Commute – Driving Alone	28%	39%	15%	29%	22%	29%

HEALTH CARE RESOURCES

The availability of health resources is a critical component to the health of a county's residents and a measure of the soundness of the area's healthcare delivery system. An adequate number of healthcare facilities and healthcare providers are vital for sustaining a community's health status. Fewer healthcare facilities and healthcare providers can impact the timely delivery of services. A limited supply of health resources, especially providers, results in the limited capacity of the healthcare delivery system to absorb charity and indigent care as there are fewer providers upon which to distribute the burden of indigent care. This section will address the availability of health care resources to the residents of Allen, Barren, Butler, Edmonson, Hart, Logan, Metcalfe, Monroe, Simpson, and Warren Counties.

THE MEDICAL CENTER AT SCOTTSVILLE IMPLEMENTATION STRATEGIES FOR ADDRESSING COMMUNITY HEALTH NEEDS 2016 – 2018

Through the research and recommendations from the Community Health Needs Assessment and hospital staff, administration and Board of Directors, the following strategies will guide The Medical Center at Scottsville leadership in addressing our community's health needs over the next three years.

1. Strengthen Partnerships With Key Community Health Providers & Organizations

A very beneficial component of the Community Health Needs Assessment process for the hospital was participating as an active member of the Barren River Initiative to Get Healthy Together (BRIGHT) Coalition. This reinforced the importance of each community partner in our quest to meet the healthcare needs of all individuals in our community. Over the next three years, The Medical Center at Scottsville will focus on continuing to strengthen relationships with the organizations listed below and developing collaborative efforts to improve healthcare within Allen and surrounding counties. Partnerships may include joint funding of initiatives, providing leadership on governing boards, information sharing and cooperative work on health related grants. This list is not meant to be exclusive and other organizations/providers will be added as identified. These agencies were identified as directly addressing community health needs and serving the populations most in need within The Medical Center at Scottsville service area:

American Cancer Society
 Kentucky Heart & Stroke Association
 Allen County Health Department
 Allen County Schools
 Kentucky Cancer Program
 Barren River Area Development District
 Medicaid Managed Care Organizations/Case Management
 Refugee Assistance Center
 Southcentral Kentucky Community Action
 Western Kentucky University Institute for Rural Health-Mobile Unit
 CORE of Scottsville and Allen County Kentucky
 Allen County Chamber of Commerce

2. Preventative Care & Disease Management Focus

The Community Health Needs Assessment provided data specific to preventative care and disease management. Council members reviewed the data and determined the following focus areas: Diabetes, Obesity, Cardiovascular Disease, Lung Cancer, Drug, Alcohol Abuse and Addiction. The hospital's plan to address these areas is as follows with the overall goal to educate individuals on the importance of taking ownership of their health and wellbeing:

Diabetes:

- The Medical Center at Scottsville will enhance awareness and utilization of the outpatient Diabetes Education Program recognized by the American Diabetes Association and located at the Health & Wellness Center through marketing of services to community and health care providers.
- The Diabetes Prevention program will be offered in conjunction with the Health & Wellness Center to provide education.
 - Classes offered in January – February 2016
 - DPP Informative Meeting in April 2016
 - Class offered in May - August 2016
 - Class offered in September – October 2016
 - Class offered in December 2016 and January 2017
 - Class offered in February, March, April, and May 2017
- Coordinate Diabetes Education Forum for the BRADD area.
 - In place of Forum, diabetes cooking demo with Celebrity Chef and Novo Nordisk in November 2016 – 90 attendees
 - Diabetes Event at the Foundry in November 2016 – 35 attendees
 - Community Diabetes Event – Seasons of Diabetes Care in November 2017-75 attendees
- Offer Diabetes CEU programs for nursing staff
 - Diabetes Care: New Treatment Guidelines in January 2016
 - Update on Diabetes Mellitus in April 2016
 - Bridging the Education Gap for patients diagnosed with diabetes in Jan 2017
- A *90 Seconds to Better Health* TV segment on Diabetes.
 - Warning Signs of Diabetes by Dr. Alvarez in February 2016

- Explore opportunities to identify readmissions of patients with a diagnosis of diabetes and enhance the process to refer patients for outpatient diabetes education.
- Explore opportunities to develop a process to identify ED admissions related to complications due to diabetes. Develop a process to assure patients have a regular healthcare provider.
- Diabetes education at hospital community outreach events (Health & Wellness Expo, Women’s Conference, etc.).
 - Free blood glucose screenings at Jacksonian Days in April 2016
 - Free blood glucose screenings at The CORE of Scottsville and Allen County in May 2016 – 34 participants
 - 30 Free blood glucose screenings at The Medical Center at Scottsville Fall Health Fair for Allen County in November 2016
- Provide diabetes education to patients in rural counties in conjunction with WKU Mobile Health Unit.
 - Glucose and A1C provided for 23 participants at Brownsville Senior Center in April 2016
 - Glucose provided for 21 participants at BG Retirement Village in May 2016
 - Glucose provided for 12 participants at Morningside Assisted Living in May 2016
 - Glucose provided for 48 participants at Edmonson County Senior Center Health Fair in May 2016
 - Blood glucose and A1C screenings provided for 17 participants at the Edmonson County Health Fair in May 2016

Obesity:

- Increase awareness and utilization of The Medical Center’s outpatient Medical Nutrition Counseling services located at the Health & Wellness Center through the marketing of services to community and healthcare providers.
- Collaborate with the Health & Wellness Center to work closely with the Registered Dietitian to host the Surgical Weight Loss Support Group to support patients who have undergone or will undergo a surgical weight loss procedure.

- Surgical Weight Loss Support Group offered monthly
- Surgical Weight Loss Seminars offered monthly
- *WellNews* article, “*The Medical Center’s Surgical Weight Loss Program Puts Patients on the Path to a Healthier Life.*” In Spring 2016
- Collaborate with local farmer’s markets on cooking demos, local food events, and healthy recipes for the community.
 - Health and Wellness Expo Cooking Demo with Farmers Market in January 2016
 - Provided healthy recipes to Foster Grandparent Program in Butler County in February 2016
 - Provided healthy recipes to WRECC for Holiday Wellness Challenge in November 2016 – January 2017
- Research grant funding in conjunction with the health department to build a permanent Farmers Market structure to assist in access to fresh fruits & vegetables for individuals.
- Partner with Community Leaders to promote an awareness of the importance of exercise and diet.

Cardiovascular:

- Continue to provide education to the community about risk factors associated with heart disease, and stroke and how to modify those risk factors through healthy lifestyle choices. This will be an ongoing campaign utilizing all media outlets, newsletters, programs at Health & Wellness Center and through Worksite Wellness for employer groups, civic organizations, etc.
 - Stoke screenings at Jacksonian Days in April 2016 and 2017
 - Blood pressure provided for 34 participants at The CORE of Scottsville and Allen County in May 2016.
 - Blood pressure provided for 10 participants at Scottsville Allen Co. Senior Center in May 2016.
 - Blood pressure provided for 50 participants at the Allen County Scottsville Health Fair in November 2016
 - Body Fat and stroke screenings provided for 12 participants at the Allen County Scottsville Health Fair in November 2016
 - Blood Pressure, cholesterol, and Body Fat screenings provided for 150 people at Allen County Scottsville Health Fair in November 2017

- 25 Stroke screenings at BAC Health Fair in January 2016
- 14 stroke screenings at Kentucky Partnership for Family Health and Safety in January 2016
- 70 stroke screenings at SCA Personal Care in March 2016
- 21 stroke screenings at HeathCo in March 2016
- 38 stroke screenings at Simpson County Community Health Fair in March 2016
- 150 students educated at Boys and Girls Club on Brain Protector Program in March 2016
- 670 students educated at Jody Richards Elementary School on Brain Protector Program in April 2016
- 20 adults educated during Foster Grandparent meeting through Community Action on stroke in April 2016
- 21 stroke screenings at The International Health Fair in April 2016
- 153 students educated at the Warren East Middle School Health and Safety Fair on Brain Protector Program in May 2016
- Reached 75 adults on education about stroke at adult day care in May 2016
- Reached 10 seniors on stroke education at Chandler Park Assisted Living in May 2016
- Reached 75 students at The International Center on stroke education in May 2016
- Provided stroke and DVT information at Women in Charge Luncheon in May 2016. Reached 28 women
- Provided 110 stroke screenings at WRECC employees worksite wellness health fair in June 2016
- 35 adults educated on Brain Protector Program at Oakland Baptist Church in August 2016
- Provided stroke/hypertension information to 75 students through the speaker's bureau program at the international center in August 2016
- Provided 30 stroke screenings at Morgantown Care and Rehab in August 2016
- Provided 25 stroke screenings at Signature Healthcare in August 2016

- Provided 23 Stroke screenings at the Healthy Aging Fair in September 2016
- Stroke screenings were provided at the Women's Conference in September 2016. 380 attendees
- Provided 12 stroke screenings at Sister Schubert's Health Fair in October 2016
- Provided 2 stroke screenings at T. Marzetti Health Fair in October 2016
- 35 stroke screenings at Atmos Energy Worksite Wellness Health Fair in November 2016
- Provided 12 stroke screenings at Scottsville Allen County Health Fair in November 2016
- 533 students educated on the Brain Protector Program at Potter Gray Elementary School in November 2016
- 96 stroke screenings were provided at the Health and Wellness Expo in January 2017
- Provided education to 65 adult women on Protecting your Brain at Women in Charge Luncheon in January 2017
- Provided 30 stroke screenings at Franklin Simpson Health Fair in March 2017
- Provided 20 stroke screenings to employees at HeathCo in March 2017
- Provided 105 stroke screenings to employees at Franklin Precision Industry in April 2017
- Provided 15 stroke screenings to seniors at the Healthy Aging Fair in April 2017
- Provided 25 Stroke screenings at Med Center Cafeteria in May 2017
- Provided 43 stroke screenings at Vermont Thread Gage Health Fair May 2017
- Provided blood pressure and stroke screenings to 14 employees at AFNI Health Fair in May 2017
- Provided Brain Protector education program to 275 students at Warren East Middle School May 2017
- Provided Stroke screenings to 18 participants at The Medical Center Albany May 2017

- Provided blood pressure, body fat, blood glucose, lipid profile and stroke screenings to 18 participants at the WRECC Morgantown Health Fair May 2017
- Provided blood pressure, body fat, blood glucose, lipid profile and stroke screenings to 22 participants at the WRECC Franklin Health Fair May 2017
- Provided Stroke/FAST education at Adult Day Care to 50 participants May 2017
- Provided blood pressure, body fat, stroke risk assessment, blood glucose and lipid profile to 63 participants at the WRECC Bowling Green Health Fair May 2017
- Blood pressure, body fat, stroke risk assessment, blood glucose, and lipid profile to 15 participants at the WRECC Leitchfield Health Fair June 2017
- Provided Brain Protectors presentation at The Medical Center teen volunteer orientation to 54 participants June 2017
- Provided 12 blood pressure screenings and 3 stroke risk assessments at the Hot Rods Health Promotion night June 2017
- Continue the systematic approach by the hospital to identify and track all heart failure patients who are admitted. Discharge planning will start at admission and will involve coaching and follow up services post discharge. The goal will be improved quality of life for the patient and reduction of ED visits and readmissions.

Cancer:

- Provide information regarding the fast and effective mammography screenings available at The Medical Center at Scottsville.
 - 541 mammograms were performed in 2016
- Educate providers on the importance of women's health and the need to order Screening Mammograms.
- Provide education on the hazards of smoking specific to lung cancer (as well as stroke and heart disease) through community outreach events such as the Health & Wellness Expo, Men's Health Event, Women's Conference, The Medical Center at Scottsville Health Fair, etc., and through Worksite Wellness and Speakers Bureau.

- Provided education to 15 residents on the dangers of smoking and lung cancer to Chandler Park Assisted Living in January 2016
 - Provided education to 75 adults on the dangers of smoking and lung cancer to Adult Day Care in February 2016
 - Provided education to 75 students on the dangers of smoking and lung cancer to the International Center in March 2016
 - Provided education on the Dangers of Smoking to 600 Rich Pond Elementary students at the Healthy Kids Fair in March 2017
 - Provided education on the Dangers of Smoking to 300 students at South Warren Middle School at the Health and Safety Fair in May 2017
- Work in conjunction with community partners for implementation of smoke free environments throughout the community.
 - Provide Cooper Clayton Smoking Cessation Classes or Freedom from Smoking Classes at The Medical Center at Scottsville.

Drug, Alcohol Abuse, and Addictions:

- Engage with community partners to promote an awareness of the impact drugs, alcohol and addiction issues bring to the residents of Allen County.
- Collaborate with community partners to increase educational opportunities in regard to drug, alcohol abuse, and addictions.
- Promote the Pain Clinic at The Medical Center at Scottsville as an alternative for those who experience chronic pain.
- Collaborate with the Allen County Sheriff's Department to provide At-Home Drug Test Kits, along with resource information, to parents in the community.
- Support and participate with the Allen County Scottsville School System and other organizations to bring awareness to the risks of driving under the influence.

3. Access to Care

- Promote utilization of the Rural Health Clinic services in lieu of ED visits when appropriate through community and worksite education.

- Promote the Community Clinic as a resource for the uninsured or underinsured for both medical care and dental needs.
 - *WellNews* article, “*Community Clinic offers Flexible, Accessible Care*” featured in Winter 2016
 - A *90 seconds to better health* TV segment on Benefits of the Community Clinic presented by Dr. Seshadri in July 2016
- Work in conjunction with the community to develop an Inter-Agency Partnership to connect the population to services for their health care needs.

Evaluation/Impact of strategic plan for 2013-2015

1. Continued Partnerships With Key Community Health Providers & Organizations

Key partners and programs are listed below:

- Allen County Health Department
 - Facilitates Cooper Clayton Smoking Cessation Classes
- Allen County Chamber
 - TMC Scottsville hosted Chamber Breakfast on Dental Clinic and Free Clinic
- Appalachia HIDTA (High Intensity Drug Trafficking Area)
 - On the Move mobile trailer for drug prevention 7th and 10th grade
 - Give Me a Reason Drug prevention programs for youth
- National Stroke Association
 - LEAP program for stroke survivors (Lifelong Education and Advocacy Program)
- Kentucky Heart Disease and Stroke Prevention Task Force
 - Care Collaborative blood pressure screening tool
- American Lung Association
 - Freedom from Smoking cessation program
- American Heart Association and Society of Cardiovascular Patient Care
 - Hands only CPR training in the community
 - Heart walk sponsor
 - Early Heart Attack Care

- Norton Healthcare and UK Healthcare Stroke Care Network
 - SCOPE Stroke screenings
 - Brain Protector program
 - Adult Education stroke program
- Barren River District Health Department
 - Barren River Initiative to Get Healthy Together (BRIGHT) Coalition
 - BRIGHT Body Mass Index (BMI) childhood obesity project
 - HIV screenings
 - Community Health Worker program
 - Colon Cancer Screening
 - Diabetes Prevention Program (CDC)
- Fairview Primary Care Center
 - Patient continuum of care for Medical Nutrition Therapy, Diabetes Education and Gestational Diabetes Education
 - Newborn Care and Safety Classes held at Fairview Clinic
- Kentucky Cancer Program
 - KCP representative on Med Center Cancer Committee
 - Assist with coordination of “Plan to Be Tobacco Free” program
 - Colon Cancer screenings
- American Cancer Society- Warren Co. Chapter
 - Assist with transportation of cancer patients
 - Look Good Feel Better Classes
 - ACS representative on Med Center Cancer committee
 - Med Center sponsors Relay for Life
- Medicaid Managed Care Program/Case Management
 - Diabetes Education and Medical Nutrition Therapy for Medicaid patients
- International Center/Refugee Assistance
 - Coordinate monthly health related speakers
- Southcentral Kentucky Community Action
 - Nutrition and Exercise education for Foster Grandparent training program and International students
- Western Kentucky University
 - Department of Public Health-
 - Institute for Rural Health
 - Glucose/A1C screenings in rural counties
 - Bone Density screenings at H&W Center
 - Glucose and Cholesterol testing at H&W Center and CORE

- Department of Nursing
 - Body Fat and BP screenings at 10K
 - Health Sciences Complex education partnership
- Allen County Schools
 - Distracted Driving Program 2014
- Farmer's Market
 - Food Service/Dietitians work with local farmer's market on cooking demo's and healthy recipes
- WBKO
 - *90 seconds to Better Health*
 - Health & Wellness Expo
 - The Medical Center 10K Classic
- American Red Cross
 - Blood drives sponsored by CHC
- Center for Disease Control (CDC)
 - Diabetes Prevention Program

2. Preventative Care & Disease Management Focus

Diabetes

- *90 Seconds to Better Health* segment on diabetes (3)
 - Dr. Hammad presented and promoted the Diabetes Education program at H&W Center. Aired in June 2014 on WBKO.
 - *Dr. Hammad- "Can weight loss surgery cure Type 2 Diabetes" in February 2015*
 - *Dr. Hammad presented "Helping Diabetic Patients stay out of the Hospital" in June 2015*
- Diabetes Forum in November 2014. 15 attendees.
- Community Health Worker Program to assist Diabetics with Medicare and Medicaid to prevent readmission
- Met with hospitalists and IT to promote diabetes education and simplify diabetes referral process
- Partnered with Sanofi Pharmaceuticals to present an A1C Champion Class in November 2013. 7 attendees.
- Glucose and HbA1c offered through WKU mobile unit at The CORE in Allen Co.
- Diabetes Prevention Program (4)
 - Class in August 2014
 - Class offered in January and April 2015
 - Class offered to CHC employees in July 2015
- CME and Continuing Education programs on diabetes

- *WellNews* Articles (6)
 - “Type 2 Diabetes: Reduce Your Child’s Risk Now” (Winter *WellNews* 2013).
 - *Education Helps Women Get Diabetes Under Quick Control* (Winter 2014)
 - *Prediabetes: Separating Fact from Fiction* article (Summer 2014)
 - *Take Control of Your Diabetes and Diabetes Disaster Preparedness* (Fall 2014)
 - *Label Logic* (Winter 2015)
 - *Program Promotes Lifestyle Changes to Prevent Diabetes* (Summer 2015)
- Blood glucose screening offered at Health & Wellness Expo 2013-2015
- Group Diabetes Education Camp offered monthly. 35 participants
- Diabetes Support Group offered monthly. 137 participants.
- Speaker’s Bureau on Diabetes (6). We reached a total of 390 people through this program.
- Diabetes Educator saw 318 patients for Diabetes Self-Management Education in 2013, 301 patients in 2014 and 304 patients in 2015.

Obesity

- Medical Nutrition Therapist and Diabetes Educator maintained monthly communication with physicians about programs
- Weight of the Nation forum (2)
 - Offered in August, and October 2013. 150 participants.
- Monthly communication with physicians about Medical Nutrition Therapy and Diabetes Self-Management
- Grocery Store Tours
- Eating Healthy During Holidays
 - Class offered in November 2013
 - Class offered in November 2014
- Healthy Weight / Healthy Life Programs (2 per year)
 - Class offered in January – February 2013
 - Class offered in August – September 2013
 - Class offered in April – May 2014
 - Class offered in August – September 2014
 - Class offered in January – February 2015
 - Class offered in April – May 2015
- The Medical Center 10K Classic training programs
- *WellNews* articles on Nutrition and Obesity (9)
 - *Eating for Two* (Spring 2013)
 - *The Skinny on Childhood Obesity* (Summer 2013)
 - *Dining Out? Choose Healthy Eating from the Menu* (Summer 2013)

- *Summer Salad Sensations* (Summer 2013)
- *The Hefty Health Toll of Obesity* (Winter 2013)
- *The Start to Better Health Is at Home* (Summer 2014)
- “*Label Logic*” (Winter 2015)
- “*Resolve to Improve Your Health in 2015*” (Winter 2015)
- “*7 Rules For Healthy Restaurant Eating*” (Fall 2015)
- Women in Charge luncheon on Wellness (6)
 - Summer Cooking Demonstration with Chef Tim O’nan and Linda Howsen in July 2013
 - 6 Dimensions of Wellness in January 2014
 - KY Health Now in January 2015
 - How Busy Women Balance Nutrition in March 2015
 - Mind, Body, and Spirit in June 2015
 - Benefits of Yoga and Meditation in July 2015
- Healthy Monday tips. Send weekly to 86 industries.
- *90 Seconds to Better Health* (5)
 - *Weight Loss Surgery to Improve Health presented in June 2013*
 - *How Sugar Affects Childhood Obesity presented in July 2013*
 - *Dr. Nwanguma presented on Gastric Sleeve procedure in April 2014*
 - *Dr. Nwanguma speaks about Obesity Health Issues in 2015*
 - *Dr. Nwanguma presented on Bariatric Surgery in January 2015*
- Speaker’s bureau on nutrition and weight management (23). 1,946 people were reached through this program.
- Surgical Weight Loss Support Group and Seminars offered each month
- Better Choices - Better Health
 - Class in October – November 2014
 - Class in April – May 2015
- Registered Dietitian saw 438 patients in 2013. 519 patients in 2014 and 528 patients in 2015.
- Heart Walk
- March for Babies
- Relay for Life
- Zumba classes offered weekly
- Yoga classes offered weekly

 - Screenings include: blood pressure, women's health, swallowing, skin cancer, neck and back, knee, fall prevention, carpal tunnel, pulmonary function, diabetic foot, blood sugar, lymphedema, fibromyalgia, dizziness, and memory screenings, balance screening, and dry needling.

Communication Plan

The Medical Center at Scottsville will publish the Community Health Needs Assessment, including the survey results and strategic plan, on its website and make hard copies available to the public upon request. The results will also be incorporated into the hospital's annual IRS tax form 990 submission.

Conclusions

The Medical Center at Scottsville has been totally committed to the Community Health Needs Assessment throughout the process. It has served already to strengthen relationships with other providers of healthcare and organizations in the community. The survey conducted led to data driven identification of key community health needs. The hospital has developed a detailed strategic plan to address these needs over the next three years with the ultimate goal to improve the quality of life in the communities we serve.
